About Our School

At ESF Quarry Bay School, we are raising children to be confident, happy and successful. We do this by recognising that every child is unique, and we work hard to support your child in developing their own skills, passions and personality. At our school, a world-class education goes hand-in-hand with enthusiasm and a love for learning. Our students build positive relationships, challenge themselves and have fun.

We follow the primary curriculum of the rigorous International Baccalaureate (IB) – the Primary Years Programme (PYP) – which has an innovative approach to learning through play and inquiry. The PYP ensures that your child will make a smooth transition to the higher levels of the IB curriculum, all the way through to the diploma programmes which are offered at ESF's secondary schools.

Education comes first and foremost at Quarry Bay School, and we have a strong focus on innovative design and technology. At the Maker and Designer Hub, there are lots of tools to help children tinker, design and invent, including a 3D printer that prints chocolate.

Whether indoors or outdoors, our students are always having fun, and always learning. The classrooms open on to a variety of outdoor spaces where children learn through play, stay active and interact with other class groups. Besides the main playground, we have an astroturf area, a magical Fairy Garden, cosy white-domed Caves, and the ever-popular Treehouse, under which you are sure to find some busy members of the Digging Club.

Nestled high up on the picturesque Braemar Hill on Hong Kong Island, our school is easy to reach from Causeway Bay and Central via bus, car or taxi. We have built a wonderfully supportive learning environment that we are truly proud of. Come for a tour to see why Quarry Bay School is the right place to help your child blossom through their primary school years and beyond.

Meet the Principal

Sue has been with ESF for over 20 years, with 12 of those being spent at her current school. Sue has fostered an incredible community spirit at her school, with teachers and staff working closely with parents to deliver an outstanding education to the students.

Sue Yee
